- 2 dual-color arrow-shaped LEDs to indicate comparison result
- Instant comparison between the current temperature and the last stored records
- Convert ear temperature to oral, rectal or axillary temperature
- Lens filter quick release function (AV07044 only)
- Automatic power-off saves on battery life
- Reading display in Celsius or Fahrenheit
- US Patent No.: 7,854,550
- With CE 0123

More Convenient!

For AV07043 & AV07044, four temperature conversion icons are used to display the relevant temperature readings of various bodily sites/locations.

More Hygienic!

AV07044 also has a "Lens filter quick release" function that helps to remove the used lens filter from the tip by just pressing the button.

Keep Tracking!

Providing 2 user IDs, with 9 memories per each user ID, Users can keep track of the temperature change and review different records of different users when necessary.

Instant Comparison!

Dr. Temp enables instant comparison between the current temperature and the last stored records by the indication of two dual-color arrow-shaped LEDs.
